

MULTILANE SACHET MACHINE MVA500

APPLICATIONS

Vertical form fill and seal of 4 side seal sachets single, twin and shaped

Suitable for medium to low production outputs

Dosing powders, granules, solid, liquid and pasty

TECHNOLOGY

Main drive systems powered by brushless servomotors

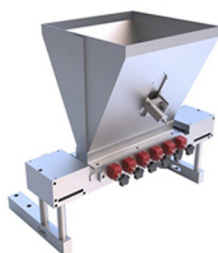

Touch screen panel and PLC control

Low maintenance and easy care

MAIN OPTIONS

Laser, Ink jet, Hot foil, and embossing coding for variable data

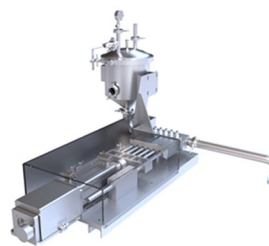

Transfer groups to the cartoning machines

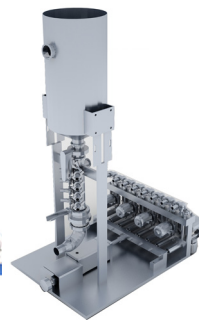

volumetric sliding doser for granulates

filling system for solids

pneumatic rotary valve doser for pasty products

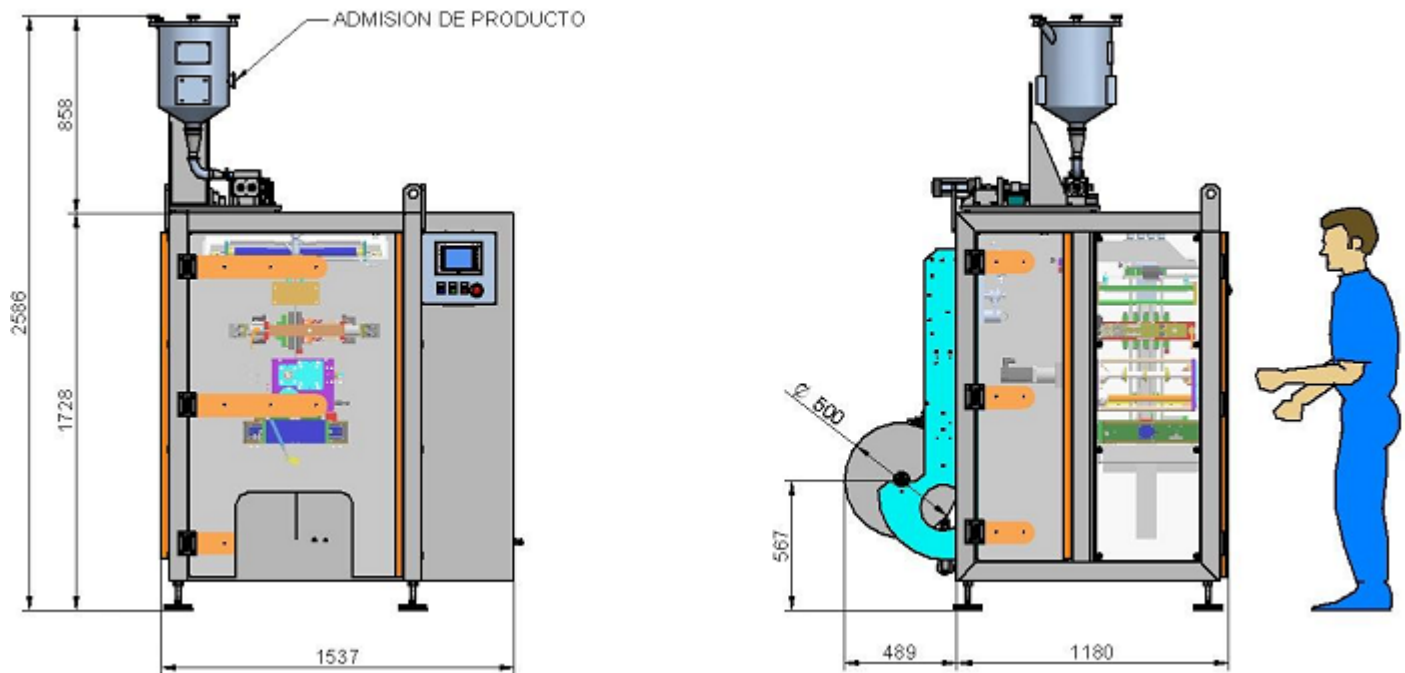

pneumatic membrane valve doser for liquids

auger filling system for powders

SPECIFICATIONS

Innova MVA500 forms, fills and seals 4 side seal flat sachets for liquids, powders, granulates and pasty product, depending on additional accessories. Provided with a 500mm reel diameter, it is designed for medium and low production outputs which require high quality sealing. It is driven by mechanical motion servo and provided with an industrial PC from B&R. It is very flexible in terms of format as it is capable to form a sachet with two different compartments already pre-cutted, different shapes and to change the sachet length through touch screen.
