

#### APPLICATIONS

Designed for high production outputs

Suitable for dosing sugar and other kinds of crystallized granulated products

#### TECHNOLOGY

Main drive systems powered by brushless servomotors

Touch screen panel and PLC control

Low maintenance and friendly use

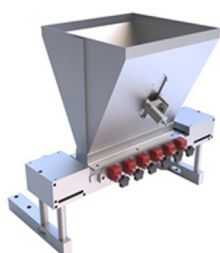

#### OPTIONAL

Laser, Ink jet, Hot foil, for variable data

Integrated pre-cutting laser for easy opening

Transfer groups to the cartoning machines

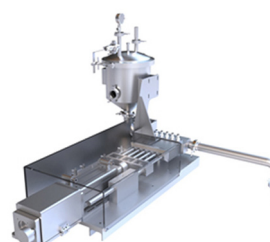

## MULTILANE STICKPACK MACHINE SP1200

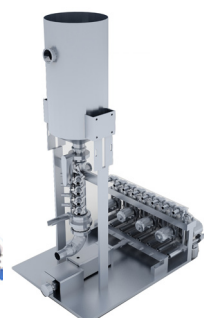

*volumetric sliding doser for granulates*

*filling system for solids*

*pneumatic rotary valve doser for pasty products*

*pneumatic membrane valve doser for liquids*

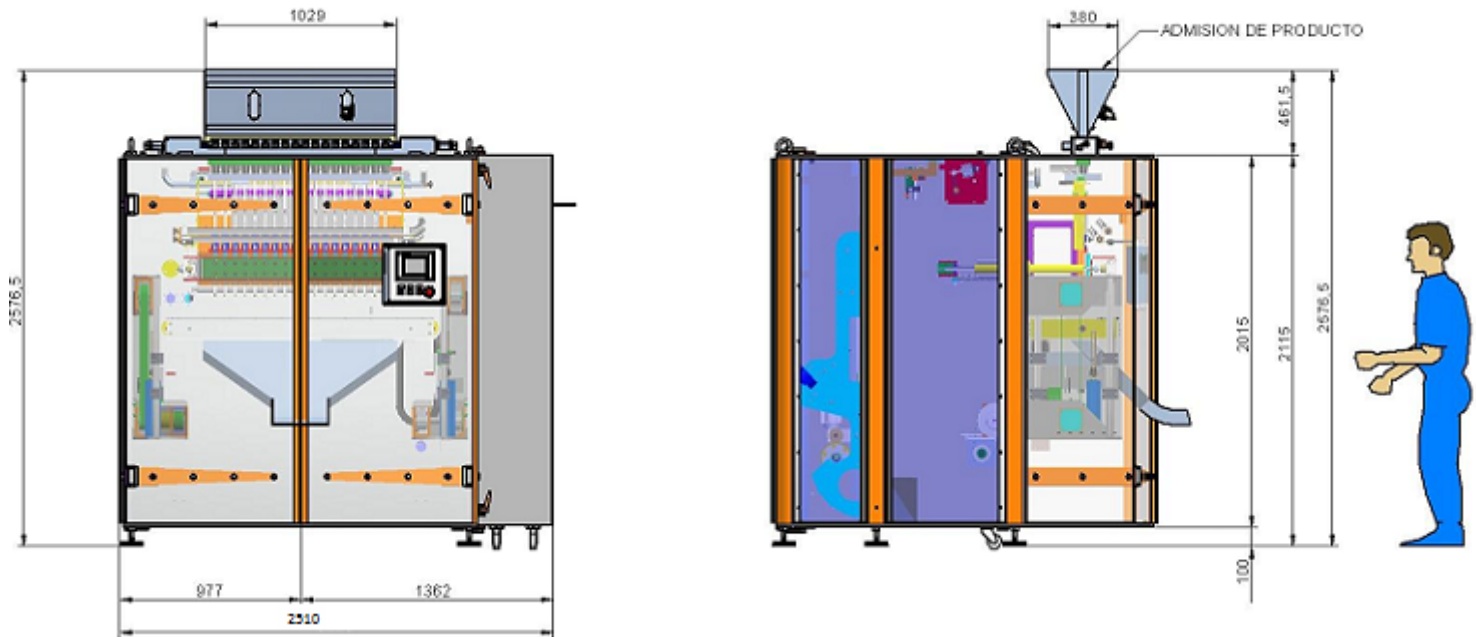

*auger filling system for powders*

# SPECIFICATIONS

SP1200 machine is a multilane equipment designed to form, fill and seal stickpacks that offers a range from 12 lanes to 30 lanes depending on stickpack width. It is suitable for high production outputs up to 1.500 sticks/ minute. It is a last generation equipment driven by brushless servomotors, built in a closed main frame including the unwinder area that avoids the dust entry. The SP1200 model is adapted to dose sugar or other type of crystallised granulated products from food sector.
